To Whom It May Concern:

The products produced by Gagne Foods under the Robinhood Meetinghouse brand or any other brand are manufactured from non-genetically modified ingredients.

Gagne Foods regularly communicates with our suppliers and vendors on the specifications of our ingredients and we take care to explore our sources. Specification sheets for each individual product are available upon request from Gagne Foods.

While Gagne Foods acknowledges that there are experts that support both sides of the GMO question, Gagne Foods is committed to a goal of not using genetically engineered wheat, dairy or any other type of component in our products.

Sincerely,

A handwritten signature in black ink that reads "Michael Gagne". The signature is fluid and cursive, with a long horizontal stroke at the end.

Michael Gagne
President – Gagne Foods
